

10-TON RIG PACKAGE

Manitex is setting new standards in reliability and quality.

We are here to help you decrease your down time and increase your productivity. These high capacity slings are engineered to provide convenience with all our lifting devices.

The nylon slings provide great resistance to rot and mildew, since the fibers do not support bacterial or fungal growth. But also not affected by immersion into either salt or freshwater.

All loose pin hardware is plated for corrosion resistance.

Manitex Part Number: 6608181
