

Manitex is here to offer a new solution to boom operations, by upgrading to our hydraulic pilot controls.

Why upgrade a good product?

- Reduced throw improve, multi-functional capabilities
- Low lever friction requirement, increases operator comfort
- Eliminates wear components

**This item is currently not compatible with the 4 function radio remote control option.*

Pilot Control Upgrade

Out with the cable, In with the hydraulic.

Better Product... Better Payback

"We installed the kit in a day and have been very pleased with the accuracy of control, low lever force required and easy installation. I would recommend the pilot control upgrade to anyone with a manually actuated system on their crane."

- James Farrington, President
Tempe Crane, Inc.
