

Georgetown, Texas, July 20, 2016 -Manitex, Inc., a leading manufacturer of boom trucks and truck mounted cranes, is pleased to introduce the all new TM200-Series to the lineup of truck tractor cranes. Developed for residential and commercial construction markets the TM200-2085T features a base rating of 20 tons and maximum main boom tip height of 95 feet.

The TM200-2085T incorporates a 6-section formed boom design utilizing high strength steel and components providing optimal strength to weight ratio for increased payload. The standard Out and Down Outriggers and short overall length of 25 feet from boom tip to fifth wheel makes this new product ideally suited for the truss industry and general construction applications.
